PEDIATRIC & DENTAL CLINIC

230 patients treated through our mobile pediatric and dental clinic services.

VOCATIONAL SKILLS TRAINING

A 12-day hairdressing training program completed by **10 participants**.

Situation Update – Aid Challenges

With nearly the entire population of 2.1 million still concentrated in less than half of the territory amid ongoing military activities, families faced extreme overcrowding, severe shelter deficiencies (affecting nearly 94% of people and critical for over half), water insecurity reached around 91% of households, and persistent shortages that disrupted essential services. As the rainy season approached, risks of flooding and further disease outbreaks loomed, compounded by access restrictions and funding shortfalls.

Despite these immense challenges, **we remained committed** to delivering clean water, mobile healthcare, and life-saving assistance to Gaza's most vulnerable families.
